

# ANISETTE

design Francesco Lucchese 2023

Vistosi

## Model SP\_CE

Anisette is a collection defined by modern geometries, reminiscent of a lantern's shape. Thanks to a special fastening system that fully conceals the mounting structure and allows the glass elements to be fixed without drilling, the two shaded white crystal diffusers can be arranged in four different configurations, playing with the inner light source and the transparency of the glass. Matt white metal finish. Available in suspension and table types.
