## Model SP 60\_CE

The collection is inspired by the rigorous design of lines and surfaces of early 1960s minimalism. Regular shapes are contrasted with softer elements through the skillful use of metal finishes and glass fabrication. The structure has been designed to allow great flexibility thanks to a fixing system of the four metal frames, which, by sliding, create ever new geometries to better.

### GLASS FINISH

**BCSF**  
white shaded

**BCST**  
white matt

### FRAME FINISH

**ANT**  
charcoal grey

**BR2**  
matt bronze 2
